Annual Business Meet Winners Announced

First place Business Meet winners.

On Friday, Feb. 15, an assembly was held for all the students enrolled in business classes and those

Tree; 5. Jennifer Morgan and Nizhone Kee; 7. Noelle Richardson; 8. Hans Hoffman; 9. Jared Jensen.

Ski racer, Sloane Reed at the EyeSpan, Peripheral Vision Trainer.

Dr. Bradley Rounds, of Heber's Wasatch Vision Center, is featured in the February issue of *The Journal of The American Optometric Association* for research he did on help for students with reading disabilities. The AOA Journal is read by over 30,000 Optometrists and other professionals who deal with vision and related care. The article, "Oculomotor Training and Reading Efficiency", describes how by the use of "Vision Therapy", a group of college-age students reading at about the fifth (5th) grade level, significantly improved their reading efficiency. The students were able to reduce wasteful eye-movements (only one part of the whole reading process) which can cause a decrease in reading comprehension, a loss of

concentration, and an increase in ocular fatigue of the reader.

Dr. Rounds has recently opened a satellite office in Park City to deal specifically with reading disabled students and adults as well as athletes.

Vision therapy has been shown to help athletes of all levels to maximize their eye-hand coordination/quickness and visual awareness (especially important in field and court sports).

Considering that over 80 percent of the information processed by the brain is visual, Dr. Rounds' philosophy is "If you are not visually fit, you are not physically fit."

The Wasatch Vision Center or Dr. Rounds can be reached at 654-1863 or 649-1267.
